Aula der Wissenschaften

Established method for shunting

Radio control the locomotive while standing on the shunters footstep.

- The established method since the beginning of freight transport on railways in Sweden
- Banned from 2nd of June 2025 for Green Cargo – Sweden's largest freight train operator

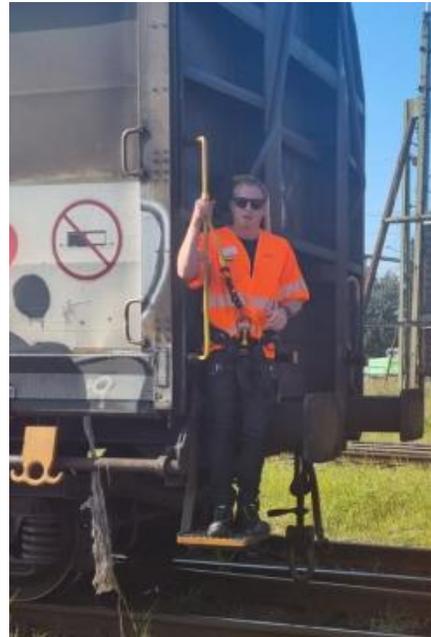

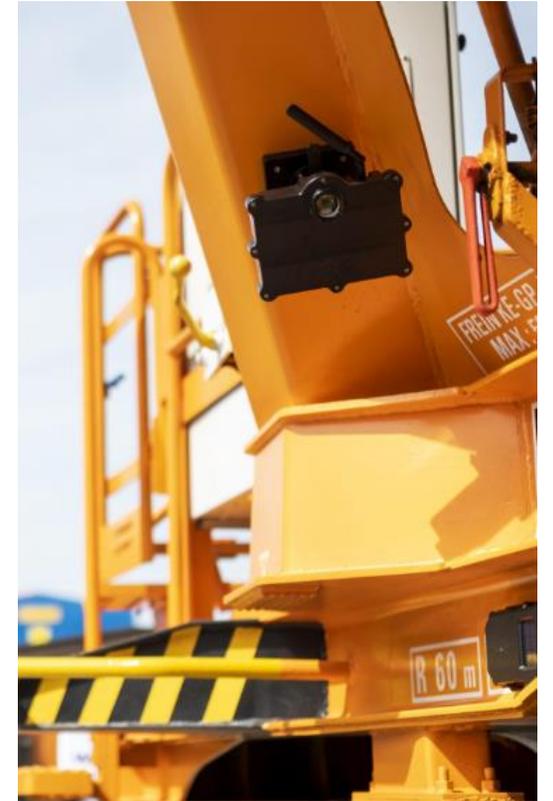

Innovations and changing mindsets

Risk based change with employee involvement

- Break down the risk assessment and implementation of new methods into detailed work methods
- Thereafter it's possible to challenge established work methods
- Withstand the pressure and test the innovative work methods with facts not feelings
