SAFETY NOTIFICATION SYSTEM – SNS

Better all together

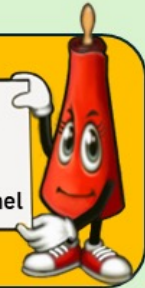

Launched in July 2024

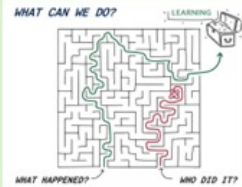

© 2024 JMZ

WHAT IS THE SNS?

It is a traffic safety occurrence reporting channel

PURPOSE

Continuous improvement of operational safety, no blame game

MAIN FEATURES

It is voluntary, confidential, independent and non-punitive, based on easy-to-use proprietary Software

DIFFICULTIES IN ITS IMPLEMENTATION

- There is no legal or technical framework to develop these systems
- Lack of awareness and leadership to implement a common SNS

The SNS does not replace other reporting channels provided for in the Safety Management System, such as emergency or early warning channels

SCOPE

GEOGRAPHICAL AREA

- Network managed by Adif
- Network managed by Adif AV

FUNCTIONAL AREAS

All those performing functions and activities with an impact on traffic safety.

- Frontline inter-workforce directly related with safety
- Outsourced frontline workforce directly related with safety
- Other staff of the organization

	Volunteer	No	No
PHASE 1	Volunteer	No	No
PHASE 2	Volunteer	Volunteer	No
PHASE 3	Volunteer	Volunteer	Volunteer

JUST SAFETY CULTURE

Safety occurrence reporting is one of the pillars of our just culture policy

SNS FLOW

The SNS is coordinated by the Corporate Traffic Safety Unit, independent from the operational units
